

2023-2028 Health Psychology Editorial Team

Editor-in-Chief

John M. Ruiz, Ph.D.

Professor, Director DEI
Department of Psychology
University of Arizona

Johnruiz@arizona.edu

Pronouns: He/him/his/el

Primary Areas: Stress, health equity, Latinx health, cardiovascular disease, psychophysiology

Brief Bio: Dr. Ruiz earned a PhD in Clinical Health Psychology from the University of Utah and completed a postdoctoral fellowship in Cardiovascular Behavioral Medicine at the University of Pittsburgh. He identifies as a first-generation Latino scholar. His program of research focuses on psychosocial and sociocultural influences on health with an emphasis on Hispanic/Latinx health. He serves in multiple local, national, and international positions including as a founding member and President of the Behavioral Medicine Research Council (BMRC) and federal appointment to the *US Preventive Services Task Force (USPSTF)*.

SENIOR ASSOCIATE EDITORS

Linda C. Gallo, Ph.D.

Professor,
Department of Psychology
San Diego State University

lgallo@sdsu.edu

Pronouns: She, her, hers

Primary Areas: Social determinants of health, sociocultural factors, diabetes, cardiovascular disease, Latinx health, healthcare system interventions, behavioral interventions

Brief Bio: Dr. Gallo earned her Ph.D. in Clinical Health Psychology from the University of Utah and completed postdoctoral fellowship in cardiovascular behavioral medicine at the University of Pittsburgh. She identifies as non-Hispanic White. She is Co-Director of the San Diego State University South Bay Latino Research Center, which is dedicated to understanding social determinants and sociocultural influences in cardiometabolic health, and developing, evaluating, and implementing culturally appropriate interventions to improve health, among Hispanic/Latino/Latinx communities

Frank J. Penedo, Ph.D.

Professor,
Department of Psychology
University of Miami
fpenedo@miami.edu

Pronouns: He, him, his

Primary Areas: psychosocial, sociocultural influences, cancer, Latinx health, translational research, healthcare and community interventions

Brief Bio: Dr. Penedo earned his Ph.D. in Clinical Health Psychology from the University of Miami and completed postdoctoral fellowship in behavioral medicine at the University of Pittsburgh. He is a Professor in the Department of Psychology and Associate Director for Cancer Survivorship & Translational Behavioral Sciences in the Sylvester Comprehensive Cancer Center at the University of Miami. Dr. Penedo's work evaluates the role of sociocultural, biobehavioral, and psychosocial mechanisms underlying disease activity and health outcomes, and the efficacy of evidence-based psychosocial interventions in promoting optimal chronic disease management and health outcomes in cancer.

ASSOCIATE EDITORS

Carmela Alcántara, Ph.D.

Associate Professor
School of Social Work
Columbia University
Ca2543@cumc.columbia.edu

Pronouns: She/her/hers

Primary Areas: Social determinants of health, sleep, behavioral medicine, health disparities

Brief Bio: Dr. Alcántara earned her PhD in Clinical Psychology from the University of Michigan. She completed her clinical internship at Bellevue Hospital Center at New York University Langone Medical Center, and a postdoctoral fellowship as a W.K. Kellogg Health Scholar at the Harvard T.C. Chan School of Public Health. Dr. Alcántara has dedicated her career to the study of social determinants of health with a specific focus on cardiovascular-related health outcomes and behaviors such as sleep. She also conducts community-based intervention research to enhance existing evidence-based behavioral interventions for health disparity populations, particularly Latinx adults. Dr. Alcántara identifies as an Afro-Latina, first-generation, cis-gender immigrant woman who is passionate about health equity.

Christopher R. France, Ph.D.

Distinguished Professor
Department of Psychology
Ohio University
france@ohio.edu

Pronouns: He/him/his

Primary Areas: Pain, blood donor motivation, health interventions

Brief Bio: Dr. Chris France obtained his PhD in Clinical Psychology from McGill University in 1991. He is a Distinguished Professor of Clinical Health Psychology at Ohio University, and his primary research interests include biopsychosocial influences on experimental and clinical pain and interventions to enhance recruitment and retention of voluntary blood and organ donors.

Lori A Francis, Ph.D.

Associate Professor of Biobehavioral Health,
Penn State University
lfrancis@psu.edu

Pronouns: She, her, hers

Primary areas of expertise: Pediatric obesity, parenting, eating behavior, executive function, stress regulation

Brief statement: Dr. Francis is a developmental health scientist with expertise in the influence of individual, family and household factors on the development of obesity in youth. She has a particular interest in research on children and families experiencing poverty.

Paige A. Green, Ph.D., MPH, FABMR

National Institutes of Health/National Cancer Institute
Paige.green@nih.gov

Pronouns: She/her/hers/ella

Primary Areas: Behavioral, biobehavioral, and psychological science mechanisms and their translational relevance for cancer prevention and control

Brief Bio: Dr. Green earned a Ph.D. in clinical psychology with an emphasis in behavioral medicine and psychophysiology from the University of Miami, Coral Gables, clinical internship at Brown University, and postdoctoral training at Memorial Sloan Kettering Cancer Center and Howard University Cancer Center. She completed an MPH from Bloomberg School of Public Health at Johns Hopkins University. Dr. Green is a past-president of the American Psychosomatic Society and the Academy of Behavioral Medicine Research and currently serves as Chief of the Basic Biobehavioral and Psychological Sciences Branch in the Division of Cancer Control and Population Sciences at NCI.

Aric A. Prather, PhD

Associate Professor of Psychiatry and Behavioral Sciences
Interim Director, UCSF Center for Health and Community
University of California, San Francisco

Aric.Prather@ucsf.edu

Pronouns: He/him/his

Primary Areas: Sleep, stress, immune function, social determinants of health

Brief Bio: Dr. Prather, earned his Ph.D. from the University of Pittsburgh, clinical internship at Duke University Medical Center, and completed postdoctoral training at the University of California, San Francisco. His work focuses broadly on the causes and consequences of insufficient sleep with particular emphasis on how sleep, or lack thereof, affects the immune system. Dr. Prather carries out basic and translational research, including the development and testing of interventions to

improve sleep and psychological well-being.

Eli Puterman, Ph.D.

Associate Professor
Canada Research Chair Tier 2 in Physical Activity and Health,
School of Kinesiology, Faculty of Education,
The University of British Columbia, Vancouver, and the
traditional, ancestral, and unceded territory of the Musqueam
people.

Eli.puterman@ubc.ca

Pronouns: He/him/his

Primary Areas: Physical activity interventions, clinical trials,
large cohort studies, experimental methods.

Brief Bio: Dr. Puterman completed his Ph.D. at the University of British Columbia in the Department of Psychology and postdoctoral training at the University of California San Francisco in the Department of Psychiatry and Center for Health and Community. He self-identifies as a member of the queer community and as a first generation Canadian. Dr. Puterman has been the Canada Research Chair in Physical Activity since 2015 and his work seeks to understand the interplay among stress, aging, and exercise.

Bert N. Uchino, Ph.D.

Professor, Health Psychology Program
Department of Psychology
University of Utah

Bert.uchino@psych.utah.edu

Pronouns: He/him/his

Primary Areas: Stress, relationships as related to psychophysiology and psychoneuroimmunology

Brief Bio: Dr. Uchino earned his Ph.D. in social psychology as well as a postdoctoral fellowship in psychoneuroimmunology at the Ohio State University. His main research focuses on the autonomic, neuroendocrine, and immune mechanisms linking social relationships and stress to health with an emphasis on aging.

Anna C. Whittaker, Ph.D.

Professor of Behavioural Medicine
University of Stirling, UK

a.c.whittaker@stir.ac.uk

Pronouns: She/her/hers

Primary Areas: Psychoneuroimmunology; cardiovascular psychophysiology of stress; healthy ageing

Brief Bio: Dr. Whittaker is a Professor in Behavioural Medicine, a health psychologist, and Fellow of the British Psychological Society working at the University of Stirling in the areas of physical activity and health, behavioural medicine, psychoneuroimmunology, and cardiovascular psychophysiology. Her physical activity research takes an inter-disciplinary mixed methods approach and she is a strong

promoter of collaboration across disciplines.
